IMPRESSION:

Elevated velocities noted in left distal CFA and left distal PTA suggestive of hemodynamically significant arterial stenosis. Recommend CTA correlation. Monophasic waveform pattern in bilateral distal ATA, left proximal PTA, bilateral distal PTA and DPA suggestive of proximal hemodynamically significant arterial stenosis. Plaques noted in bilateral lower extremity arteries.

Electronically Signed by JAFERY, SYED ALI WASSI DR. at 14-Jul-2025 08:16:42 PM CST
